

Line Number	Identifier	Error Name	Error	Error Correction
6	numbers (int array[10])			
16	numbers	Runtime	Array index out of bounds (i<=10 accesses numbers[10])	Use i<10
22	sum (int variable)			
26	sum	Logical	Sum overwritten instead of accumulated	Use sum += numbers[i]
30	average (float variable)			
32	average	Logical	Integer division before float assignment	Use (float)sum/10
34	average	Semantic	Wrong printf format specifier (%d for float)	Use %f
38	marks (int array[5])			
42	highest (int variable)			
46	highest	Logical	Finds lowest value instead of highest	Use marks[i] > highest
54	attendance (int array[5])			
60	attendance	Runtime	attendance[5] out of bounds	Use indices 0-4
62	present (int variable)			
64	present	Runtime	Loop accesses attendance[5]	Use i<5
72	subject (char array[10])			
74	subject	String Handling	Buffer overflow copying 'ComputerScience'	Increase array size
80	branch (char array[20])			
82	branch	Semantic	Array assigned directly to string literal	Use strcpy(branch,"IT")
88	college (char array[10])			
95	college	Logical	Character array may not be null terminated as string	Add '\0' terminator
101	fees (int array[5])			
103	fees	Semantic	String used as array index	Use integer index
105	fees	Semantic	Float used as array index	Use integer index
119	result (int array[5])			
123	result	Runtime	scanf missing address operator	Use &result[i]
129	totalResult (int variable)			
139	stock (int array[5])			
141	stock	Logical	Assignment used in condition	Use ==
147	backup (int array[5])			
149	backup	Semantic	Array assignment invalid in C	Copy elements individually
155	salary (float array[5])			
159	salary	Semantic	Wrong printf format specifier	Use %f
163	inventory (int array[5])			
165	inventory	Runtime	Loop writes inventory[5]	Use i<5
177	city (char array[8])			

179	city	String Handling	Buffer overflow copying JaipurCity	Increase array size
185	count (int array[5])			
187	count	Semantic	Array assignment invalid	Copy elements individually
193	printf	Syntax	Missing semicolon after printf statement	Add ;
