

Line Number	Identifier	Error Name	Error	Error Correction
6	marks (int array[5])			
10	total (int variable)			
18	average (float variable)			
20	average	Logical	Integer division before float assignment	Use (float)total/5
26	highest (int variable)			
40	lowest (int variable)			
44	lowest	Logical	Comparison finds highest not lowest	Use marks[i] < lowest
52	attendance (int array[5])			
60	present (int variable)			
62	present	Runtime	Loop accesses attendance[5]	Use i<5
70	subject (char array[8])			
72	subject	String Handling	Buffer overflow copying Programming	Increase array size
78	branch (char array[10])			
80	branch	Semantic	Wrong scanf argument type (&branch)	Use branch
86	fees (int array[5])			
88	fees	Runtime	fees[5] out of bounds	Use indices 0-4
100	stock (int array[5])			
102	stock	Logical	Assignment used in condition	Use ==
108	backup (int array[5])			
110	backup	Semantic	Array assignment invalid	Copy elements individually
116	salary (float array[5])			
120	salary	Semantic	Wrong printf format specifier	Use %f
124	result (int array[5])			
128	result	Runtime	scanf missing address operator	Use &result[i]
134	totalResult (int variable)			
146	city (char array[10])			
148	city	Semantic	Array assigned directly to string literal	Use strcpy(city,"Jaipur")
154	inventory (int array[5])			
156	inventory	Semantic	String used as array index	Use integer index
158	inventory	Semantic	Float used as array index	Use integer index
168	inventory	Runtime	Loop accesses inventory[5]	Use i<5
174	college (char array[5])			
180	college	Logical	Missing null terminator for string	Add '\0'

184	count (int array[5])			
186	count	Semantic	Array assignment invalid	Copy elements individually
192	course (char array[6])			
194	course	String Handling	Buffer overflow copying Computer	Increase array size
200	numbers (int array[5])			
202	numbers	Runtime	Loop writes numbers[5]	Use i<5
216	return statement	Syntax	Missing semicolon after return 0	Use return 0;
