

Line Number	Identifier	Error Type	Error	Error Correction
1	Header File (<stdio.h>)			
2	Header File (<string.h>)			
4	Function Definition (main)			
6	Array Declaration (int sales[5])			
8	Function Call (printf)			
10	Variable Declaration (int totalSales)			
12	Loop Declaration (for)			
14	Assignment (totalSales += sales[i])			
17	Function Call (printf)			
19	Variable Declaration (float averageSales)			
21	Assignment (averageSales = totalSales / 5)	Logical Error	Integer division occurs before assignment to float	averageSales = totalSales / 5.0;
23	Function Call (printf)	Semantic Error	%d format specifier used with float	printf("Average Sales = %f\n", averageSales);
27	Variable Declaration (int highestSale)			
29	Loop Declaration (for)			
31	Conditional Statement (if)	Logical Error	Condition identifies minimum value instead of maximum	if(sales[i] > highestSale)
33	Assignment (highestSale = sales[i])			
37	Function Call (printf)			
41	Array Declaration (int monthlySales[5])			
43	Array Element Assignment (monthlySales[0])			
44	Array Element Assignment (monthlySales[1])			
45	Array Element Assignment (monthlySales[2])			
46	Array Element Assignment (monthlySales[3])			
47	Array Element Assignment (monthlySales[4])			
49	Array Access (monthlySales[5])	Runtime Error	Index 5 exceeds valid range 0-4	Use indices 0-4 only
51	Function Call (printf)			
53	Loop Declaration (for)	Runtime Error	Loop condition i<=5 accesses monthlySales[5]	for(int i=0;i<5;i++)
55	Function Call (printf)			
60	Array Declaration (char product[8])			
62	Function Call (strcpy)	Runtime Error	Destination array too small for source string "LaptopComputer"	Increase array size
64	Function Call (printf)			
68	Array Declaration (char category[15])			
70	String Assignment (category = "Electronics")	Semantic Error	Character arrays cannot be assigned directly	strcpy(category, "Electronics");
72	Function Call (printf)			
76	Array Declaration (int stock[5])			
78	Array Access (stock["first"])	Semantic Error	String literal used as array index	Use integer index
80	Array Access (stock[2.7])	Semantic Error	Floating-point value used as array index	Use integer index
82	Loop Declaration (for)			
84	Array Element Assignment (stock[i])			
87	Function Call (printf)			
89	Loop Declaration (for)			
91	Function Call (printf)			
96	Array Declaration (int orders[5])			
98	Loop Declaration (for)			
100	Function Call (scanf)	Semantic Error	Array element passed without address operator	scanf("%d", &orders[i]);
105	Variable Declaration (int totalOrders)			
107	Loop Declaration (for)			
109	Assignment (totalOrders += orders[i])			

112	Function Call (printf)			
116	Array Declaration (int revenue[5])			
118	Conditional Statement (if)	Logical Error	Assignment operator used instead of comparison	if(revenue[2] == 3000)
120	Function Call (printf)			
125	Array Declaration (int backupRevenue[5])			
127	Array Assignment (backupRevenue = revenue)	Semantic Error	Arrays cannot be assigned directly	Use memcpy() or copy elements individually
129	Function Call (printf)			
133	Array Declaration (float commission[5])			
135	Array Element Assignment (commission[0])			
137	Function Call (printf)	Semantic Error	%d format specifier used with float	printf("%f\n", commission[0]);
141	Array Declaration (char city[10])			
143	String Assignment (city = "Jaipur")	Semantic Error	Character arrays cannot be assigned directly	strcpy(city, "Jaipur");
145	Function Call (printf)			
149	Array Declaration (char branch[5])			
151	Array Element Assignment (branch[0])			
152	Array Element Assignment (branch[1])			
153	Array Element Assignment (branch[2])			
154	Array Element Assignment (branch[3])			
156	Function Call (printf)	Runtime Warning	Character array is not null-terminated before printing with %s	Add branch[4] = '\0';
160	Array Declaration (int employees[5])			
162	Loop Declaration (for)	Runtime Error	Loop condition i<=5 accesses employees[5]	for(int i=0;i<5;i++)
164	Array Element Assignment (employees[i])			
167	Function Call (printf)			
169	Loop Declaration (for)			
171	Function Call (printf)			
176	Array Declaration (char department[6])			
178	Function Call (strcpy)	Runtime Error	Destination array too small for source string "Marketing"	Increase array size
180	Function Call (printf)			
184	Array Declaration (int expenses[5])			
186	Array Assignment (expenses = sales)	Semantic Error	Arrays cannot be assigned directly	Use memcpy() or copy elements individually
188	Function Call (printf)			
192	Array Declaration (int ratings[5])			
194	Array Access (ratings[-1])	Runtime Error	Negative index access is invalid	Use indices 0-4
196	Function Call (printf)			
200	Array Declaration (int feedback[5])			
202	Array Element Assignment (feedback[0])			
203	Array Element Assignment (feedback[1])			
204	Array Element Assignment (feedback[2])			
205	Array Element Assignment (feedback[3])			
206	Array Element Assignment (feedback[4])			
208	Function Call (printf)	Semantic Error	%s format specifier used with integer argument	printf("%d\n", feedback[0]);
212	Function Call (printf)	Syntax Error	Missing semicolon at end of statement	printf("Report Generated Successfully\n");
214	Return Statement
